

# SupaPowa® Pebble | Disc

## Product Description

The Disc receiver complements mobile devices that are not yet wireless power ready. The Disc has two short integrated leads that support either Micro-USB or Lightning connection to your device. (For earlier iPhone® models, a 30 pin adaptor is available upon request, which simply plugs onto the Micro USB connector). It is important to note that the receiver supports connection to one device at a time and is single-sided.
